

Richard Huynh

Education

University of Georgia | Athens, Georgia
Bachelor of Science in Computer Science

Present
anticipated May 2026

Experience

Sepia Innovations | Tokyo, Japan
Software Engineer Intern

July 2024

- Acquired foundational knowledge of the Angular TypeScript framework to develop the front-end for a personal budget tracker.
- Created data visualizations, including graphs, to effectively display user input related to income and expenses.

UGAHACKS 9 | Athens, GA

February 2023

- Engaged in a weekend-long program featuring workshops on Web & App Development, Database Management, GitHub, APIs, Internet of Things (IoT), and UI/UX Design.
- Contributed to a hackathon team that redesigned an existing application interface, focusing on front-end development with Figma.

Brenau University | Gainesville, GA

January 2022 – May 2022

Information Technology Intern

- Supported the IT Department in debugging the university website and participated in discussions regarding its revamping.
- Advocated for web accessibility best practices, emphasizing the importance of inclusive design.
- Enhanced skills in HTML and CSS through practical application and project involvement.

Projects

Front-End Budget Tracker | Angular

Summer 2024

- Developed a user-friendly front-end for a personal budget tracker.
- Implemented graphical displays to visualize user input on income and expenses.

UGA Bus App Redesign Project | Figma

Winter 2023

- Collaborated with a hackathon team to redesign the UGA app, addressing issues of bus overcrowding and user access to real-time capacity information.
- Led the design of the front-end interface using Figma to enhance the user experience
